ABOUT ME

I am a graduate of the Surabaya State Electronics Polytechnic from the Diploma 3 Informatics Engineering Study Program. During my studies, I have gained a basic understanding of various programming languages. I also have knowledge in the field of user interface design (UI/UX), which helps me understand the importance of an intuitive and engaging user experience. In addition, I have studied basic networking concepts, which allows me to understand and handle connectivity issues and network infrastructure. My academic experience includes practical projects involving application development, system design, and implementation of technology solutions. I have strong analytical skills and enjoy solving complex technical problems. I also have a passion for continuous learning and self-development in the field of information technology. I believe that the combination of technical knowledge, analytical skills, and a desire to continue learning makes me ready to contribute in a dynamic professional environment.
